SHAFQAT AZIZ

COMPUTER SCIENCE | DIGITAL TECHNOLOGY | ARTIFICIAL INTELLIGENCE | MACHINE LEARNING

London, United Kingdom | +44 7454 758123 | shafqataziz1996@gmail.com

Google Scholar: XfjgVpYAAAAJ | ORCID: 0009-0006-7293-1957

PROFESSIONAL PROFILE

Computer Science-trained digital technology professional with experience in web development, e-commerce, digital product delivery, UI/UX and project management, complemented by an emerging research profile in Artificial Intelligence, Machine Learning and Data Mining. Experienced in end-to-end digital delivery, including requirements, interface design, development, testing, maintenance and stakeholder coordination. Delivered more than 2,000 digital projects for clients across finance, retail and education and developed web applications and an administration panel for a 250-person organisation. Academic qualifications include an MSc in Project Management, M.Phil. in Computer Science and BS in Computer Science.

CORE EXPERTISE

Artificial Intelligence	Applied AI, intelligent decision-support and computational methods
Machine Learning	Classification, feature ranking, model evaluation and applied ML
Data Mining	Data-driven analysis, feature selection and ranking
Ensemble Learning	Stacking, delegation and hybrid classification methods
Digital Technology	Web applications, e-commerce systems, CMS and digital products
Web & UI/UX	HTML5, CSS3, JavaScript, responsive design, UI components and UX refinement
E-commerce	Shopify, WooCommerce, WordPress and online storefront development
Project Delivery	Requirements, stakeholder coordination, testing, maintenance and release planning

RESEARCH PROFILE

Research interests focus on applied artificial intelligence and machine learning, particularly classification, feature ranking, ensemble methods and decision-support applications. Current scholarly work spans machine-learning-based seizure prediction, digital-twin-assisted decision support for reverse osmosis under solar-availability conditions, and hybrid stacking/delegation approaches for classification.

GOOGLE SCHOLAR & RESEARCH METRICS

Profile	Shafqat Aziz | Google Scholar User ID: XfjgVpYAAAAJ
Citations	7
h-index	1
i10-index	0
Publications	3 publications shown on the supplied profile
Research areas	Artificial Intelligence | Machine Learning | Data Mining
Affiliation	The University of Azad Jammu and Kashmir, Muzaffarabad, Pakistan
ORCID	0009-0006-7293-1957

EDUCATION

MSc Project Management | The University of Law, London Campus | *2022–2024*

M.Phil. Computer Science | The University of Azad Jammu & Kashmir, Muzaffarabad | *2018–2020*

BS Computer Science | The University of Azad Jammu & Kashmir, Muzaffarabad | *2013–2017*

PROFESSIONAL EXPERIENCE

E-Commerce Project Designer | Plymouth Hope, London | *01 Oct 2025–10 Oct 2027*

- Contribute to digital and e-commerce project design and delivery, applying web, digital-design and project-management skills to organisational outputs.
- Support technology-enabled digital content, user-facing materials and project activities within a UK organisational environment.

Ecommerce Store Manager | GTC Accountants, Islamabad (Remote) | *Jul 2021–Sep 2025*

- Developed a new administration panel reported to improve operational efficiency by more than 30%.
- Developed original e-commerce websites and web applications covering design, coding, testing and maintenance for a 250-person organisation.
- Worked with owners, marketing teams and back-end developers to plan website releases and coordinate delivery.
- Integrated e-commerce functions using Shopify and WooCommerce.
- Provided branding consultation and developed digital asset kits including logos, banners and UI mock-ups.

Web Developer | Skyline Software Solutions, Islamabad | *2019–2021*

- Designed digital assets for websites, social media and digital advertising.
- Assisted with rebranding projects and implemented modern UI components for e-commerce websites.
- Supported UX testing and visual refinement using customer feedback and analytics.

Web & Graphic Engineer | Fiverr & Upwork, Remote / International | *2017–2019*

- Built and delivered 2,000+ digital projects for global clients across finance, retail and education.
- Designed and launched SEO-optimised, mobile-friendly websites using CMS platforms.
- Managed diverse client requirements and delivered digital products across multiple business contexts.

Internee | SCO Azad Kashmir, Pakistan | *2016*

- Supported e-commerce campaigns and digital storefronts for national and international brands.
- Created UI components, graphics and video assets for web and social channels.
- Worked with marketing and engineering teams to support design-to-development alignment.
- Deployed and tracked digital advertising campaigns through Meta and Google Ads.

(2026). “An Offline Digital-Twin-Assisted Decision-Support Framework for Dynamic RO Under Kuwait Solar-Availability Conditions.” Membranes, 16(9), 281. DOI: 10.3390/membranes16090281. Google Scholar citations shown: 1.

3. Aziz, S., Abbasi, S. M., Mir, A. A., Butt, F. M., & Khan, A. Q. (2026). “Hybridzation of Stacking and Delegation for Classification.” International Journal of Artificial Intelligence and Expert Systems, 15(1), 1–19. Published 15 March 2026.

RESEARCH CONTRIBUTIONS

- Machine-learning feature ranking and classification for epileptic-seizure prediction.

- Digital-twin-assisted decision support for dynamic reverse-osmosis operation under solar-availability conditions.
- Hybridisation of stacking and delegation approaches for classification.
- Application-oriented AI/ML research connecting computational methods with practical decision-support problems.

RESEARCH & TECHNICAL P-ROJECTS

- Hybrid Ensemble Classification — research involving stacking and delegation approaches for classification.
- Machine-Learning Feature Ranking — chi-square feature ranking and machine-learning algorithms for seizure prediction.
- Digital-Twin-Assisted Decision Support — offline digital-twin-assisted framework for dynamic reverse osmosis under solar-availability conditions.
- E-commerce Administration Panel — end-to-end administration-system development with reported operational-efficiency improvement exceeding 30%.

TECHNICAL SKILLS

Web	HTML5, CSS3, JavaScript (basic), Liquid
CMS / E-commerce	WordPress, Shopify, WooCommerce, Wix, Squarespace
UI/UX & Design	Adobe Photoshop, Illustrator, Canva, CapCut; UI components and UX refinement
Marketing Technology	Google Ads, Meta Ads Manager, Mailchimp; SEO-oriented web delivery
Development	Git (basic), Visual Studio Code; coding, testing and maintenance
Technical Support	PCs, printers, scanners, routers and basic networking
Research	Artificial Intelligence, Machine Learning, Data Mining, classification and ensemble methods

ACADEMIC & PROFESSIONAL DEVELOPMENT

- Meta (Facebook) Blueprint Certified
- Google Ads Certified
- Adobe Certified Professional — Photoshop & Illustrator
- Google UX Design Certificate
- Advanced Canva Design — Visual Branding & Layout
- Brand Identity Development — Great Learning
- Brand Design Certification — Great Learning
- Advanced WordPress Course — Barani Institute of Information Technology, March 2021
- Building a Small Business Website with WordPress — LinkedIn Learning, completed 10 December 2022

INTERNATIONAL & CROSS-SECTOR EXPERIENCE

International delivery	2,000+ digital projects delivered through Fiverr and Upwork for clients across finance, retail and education
UK experience	Current UK-based digital/e-commerce project-design experience at Plymouth Hope
Organisational technology	Web applications and administration-panel development for a 250-person organisation
Research applications	Health-related ML prediction, digital-twin decision support and classification methods
Cross-disciplinary profile	Computer Science + project management + digital technology + applied AI/ML

PROFESSIONAL & RESEARCH COLLABORATION

Professional work has involved direct collaboration with business owners, marketing teams, back-end developers, engineering stakeholders and international clients. The research record includes co-authored work in applied machine learning and decision-support research. Specific collaboration evidence can be provided through recommendation letters, publication records and supporting project documentation.

SELECTED ACHIEVEMENTS

- Delivered more than 2,000 digital projects for international clients.
- Developed an administration panel with a reported improvement of more than 30% in operational efficiency.
- Developed and maintained e-commerce websites and web applications for a 250-person organisation.
- Built experience across finance, retail and education through international digital projects.
- Established a scholarly profile in Artificial Intelligence, Machine Learning and Data Mining with three publications and seven Google Scholar citations.
